

HYGIENIC STAINLESS STEEL MANWAYS

Axiom Process offers a comprehensive range of stainless steel manways providing access to tanks, storage vessels and ducting systems. Used extensively throughout the process industries, our manways are designed for low and high pressure applications. Our specialist in-house fabrication services enable us to offer tank manways to customer specification.

- Rectangular, circular and oval designs
- Lever, clamp and swivel arm options
- Sizes from 100mm up to 1200mm diameter
- Mirror polished and bead blasted finishes offered
- Silicone, *Viton®, nitrile, natural rubber and EPDM seal options available
- Alternative hand wheels in stainless steel or nylon available
- Safety locks and grids available
- Ancillary items include tank ferrules with full material traceability, sightglasses and sprayballs

HYGIENIC STAINLESS STEEL MANWAYS - SEAL MATERIALS

The operating temperature ranges for the manways are determined by the seal material used.

The standard seal materials are shown but alternative materials available include Viton®, silicone, nitrile, natural rubber and EPDM.

Temperature ranges				
Natural rubber	Nitrile	Silicone	EPDM	*Viton®
-50 to +90°C	-15 to +110°C	-50 to +200°C	-45 to +110°C	-20 to +200°C

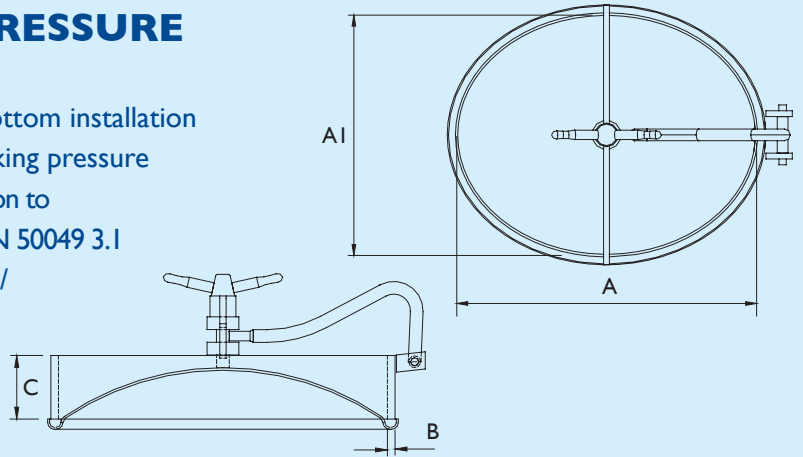

Replacement seals are available for all our manways

*Viton® is a registered trademark of DuPont Dow Elastomers

OVAL MANWAYS - HIGH PRESSURE

- Designed for side/bottom installation
- Up to 9 barg working pressure
- Material certification to BS EN 10204/DIN 50049 3.1
- Mirror polish lid/brushed skirt
- Alternative seal materials available

CIRCULAR MANWAYS - HIGH PRESSURE

8193

- Designed for use in the pharmaceutical, cosmetic and food industries
- Up to 6 barg working pressure
- Material certification to BS EN 10204/DIN 50049 3.1
- Full vacuum rated
- Satin finish lid/brushed skirt
- Domed, low retention cover complete with handle and lid resting foot
- Glueless seal
- Alternative seal materials available

ANCILLARY PRODUCTS FOR STAINLESS STEEL TANK MANWAYS

CUSTOMISED STAINLESS STEEL TANK FERRULES

We produce a comprehensive range of 316L stainless steel tank ferrules which are generally used for welding onto tanks and vessels. The ferrules which are available in sizes from ½” – 10”, can be produced in a variety of lengths to suit customer specification. They can also be produced from ASME BPE compliant 316L stainless steel as well as a range of exotic materials including Hastelloy®.

The ferrules are available with an internal finish of 0.8 µm Ra as standard with 0.4 and 0.25 µm Ra options available. Each ferrule is part marked with the heat number and material grade providing full traceability to BS EN 10204/DIN 50049 3.1

It is important to note that tank manways should be used as the cutting template. Please contact us if skirt length is critical.

STAINLESS STEEL SPRAYBALLS

To complement our range of tank manways, we supply static sprayballs, nozzles and rotating sprayheads as a cost effective solution for many tank washing duties.

- Manufactured in 316L stainless steel
- 180° upward, 180° downward and 360° spray patterns
- Customised spray patterns to order
- Screw in or clip on options available
- Fabricated sprayball assemblies to customer specification

CLAMP SIGHTGLASSES

Clamp sightglasses can be fitted to tank manways so that inspection can be carried out without having to open the tank manway lid

Standard sizes 1" – 12"

Manufactured in Duplex or Hastelloy® alloys

Temperature: - 60°C up to + 300°C

Pressure: From full vacuum to 16 barg

Material Certification to BS EN 10204/DIN 50049 3.1

It is important to note that tank manways should be used as the cutting template. Please contact us if skirt length is critical.

FABRICATION

Axium Process is a specialist stainless steel system fabricator supplying custom built process equipment, components, fittings and filtration systems:

- All welders are dual coded ASME IX, BS EN 287-1
- Manual and orbital welding
- In-house machining, fabrication and polishing
- Certificated surface finishes to 0.05 μ m Ra
 - Bead blasting, mirror and electropolishing options
 - Material traceability to BS EN 10204 / DIN 50049 3.1
 - 304, 316, 316L stainless steel options (only stainless steel fabricated on site)
 - Comprehensive stock of hygienic stainless steel tube & pipe fittings
